

# Startbase

## User development on Startbase!

At the beginning of March, we celebrated reaching the 500 user limit. One month later almost 100 new users joined our community. That means a platform growth of nearly 20% during the last month. We are very satisfied that we continue to grow strongly.

But let's take a closer look at the individual user groups:

In total there are 597 companies listed on Startbase now: **494 startups, 68 investors** and **35 corporates**. Since March, 76 startups joined us. From those 76 companies 60 have a B2B focus, 35 a B2C focus, 6 a C2C focus and 4 a C2G focus (double entries were possible). Most of them maintained digital services as their business model followed by SaaS.

We also welcomed 14 new investors on our platform. Among them are well-known corporate venture capital representatives as well as Venture Capitalists.

Last but not least, 5 corporates joined the platform.

You already have a Startbase account! Awesome, then take your chance and get in touch with each other! You haven't signed up yet? Register now and see all profiles on Startbase!

We don't take a break improving our platform. We will launch a new category of enablers on our platform soon. Furthermore, we recently refined the filter and selection opportunities for startups, investors and corporates on Startbase. You can find the perfect match for you now within less than 10 seconds!
